

Facebook Page Setup for Craft Businesses

Why Facebook Still Matters

Despite newer platforms, Facebook remains the largest social network in the UK. Its strength for craft businesses is local reach — events, market announcements, and community groups. If your customers are over 35, Facebook is essential.

Step 1 — Create Your Page

1. Log into Facebook on a desktop browser
2. Click the menu (top right) → "Pages" → "Create new Page"
3. Choose "Business or brand"
4. Name: your trading name (not personal name)
5. Category: type your craft type and choose the closest match

Step 2 — Complete Your Profile

- **Profile photo:** Your logo or a clean product photo (170×170px)
- **Cover photo:** A wide banner showing your work or studio (820×312px)
- **About section:** What you make, where, and how to buy. Include your website.
- **Contact info:** Website URL, email, phone if public
- **Location:** Set your town/region so local buyers can find you
- **Hours:** Add if relevant (especially for studios or shops)

Step 3 — Your First 5 Posts

Post 1: Introduction — who you are, what you make, where to find you.

Post 2: Your workspace or process — behind the scenes.

Post 3: Your most popular product — with photo and price.

Post 4: Something personal — why you started, what you love about your craft.

Post 5: A call to action — link to your shop, ask people to share your page.

Monthly Maintenance

- Post 2-3 times per week minimum
- Reply to all comments within 24 hours (this affects your "responsiveness" badge)

- Join 2-3 local Facebook Groups and participate genuinely — don't just post promotions
